Personal information

First name(s) / Surname(s) **Norberto Cintio**
Address(es) 18, Via Scarmagno, 00166, Rome, Italy
Telephone(s) Mobile: +39 335 5979487
Fax(es)
E-mail norberto.cintio@gmail.com
Nationality Italian
Date of birth July 29th, 1961
Gender Male

skills and competences

Sono un professionista IT con esperienza trentennale.

Mi sono occupato, nel corso della carriera, di tutti gli aspetti riguardanti progettazione, realizzazione e manutenzione del software sia per ciò che riguarda gli aspetti funzionali che tecnici.

Nell'ambito tecnico mi sono occupato, e con ottimi risultati, non solo della progettazione/programmazione vera e propria ma anche degli aspetti architetturali sistemistici legati al corretto funzionamento dei sistemi, maturando quindi competenze indispensabili per il problem-solving, la system-integration ed il performance tuning.

La mia posizione all'interno della Oracle Corporation, in aggiunta alle mie precedenti esperienze di Imprenditore e Consulente Free-lance, mi ha anche consentito di ricoprire ruoli di technical leader nonché di Project Manager e di poter gestire direttamente I rapporti, anche economici, sia con la proprietà che con I clienti.

Dopo l'esperienza di Oracle mi sono occupato principalmente di:

- Problem-solving/Troubleshooting
- IT management
- Product management
- DataBase design and administration
- Training

Per ciò che riguarda il "DataBase design and administration" aggiungo che le mie competenze a 360° mi consentono, specialmente all'interno di organizzazioni complesse, di ricoprire agevolmente il ruolo di "Senior DBArchitect" potendo essere, come prescrive la teoria, di supporto a:

- **Software Development**, per ciò che concerne
 - la definizione e l'ottimizzazione dei disegni-dati
 - l'ottimizzazione delle performances delle applicazioni
- **Esercizio**, per ciò che riguarda
 - l'ottimizzazione dell'uso dell' architettura da parte degli RDBMS
 - il Troubleshooting
 - il Performance tuning

Ovviamente la mia esperienza tecnologica riguarda principalmente la stack di prodotti Oracle ma, proprio per le mie competenze di system integrator, ho acquisito esperienze di gestione, configurazione e troubleshooting anche su architetture diverse quali:

- Apache Jboss/Tomcat
- Database MySQL
- Apache/PHP

Mi sono inoltre occupato di progettazione, realizzazione ed esercizio di

- Siti web CMS

- Siti web E-Commerce

Per sintetizzare: posseggo competenze, capacità ed esperienza per:

- Fornire servizi di consulenza tecnica specifica su architetture sistemiche basate su tecnologie Oracle in ambiente Unix, aix, linux e fornire servizi di consulenza nel data design, performance tuning, sicurezza e testing.
- Fornire servizi di consulenza nell'ambito della progettazione del software e della system integration, potendo seguire un progetto informatico a partire dall'inizio della sua progettazione fino al suo rilascio in esercizio.
- Assumere direttamente la responsabilità tecnico-economica dei progetti e del coordinamento delle risorse in staff.
- Assumere la responsabilità della gestione di una intera infrastruttura IT.

Nell'ambito della progettazione del software, in particolare, ho le competenze per:

- analizzare i processi di business
- sviluppare/ottimizzare i modelli derivanti
- strutturare gli use cases e da questi derivare i requisiti progettuali ed architetture delle soluzioni informatiche

Ho inoltre avuto modo di approfondire le problematiche informatiche ed organizzative dei clienti su diverse verticalizzazioni:

- Banche e assicurazioni (bnl, fideuram)
- Ministero delle finanze (sogei)
- Telecomunicazioni (wind, vodafone, telecom italia)
- Pubblica amministrazione locale e centrale (Min. Interni, Min. Grazia e giustizia, Min Svil. Economico, Provincia di Napoli, Protezione Civile Nazionale)
- Retail (Coop Adriatica)
- Industry (Magona Industries (Arcelor group), Colussi Perugia, Fiorucci Alimentare)

ed ho avuto modo di approfondire le problematiche di gestione riguardanti la Normativa sulla Salute e Sicurezza sul Lavoro (Lg 81/08 e successive ex 626)

Ho maturato anche esperienze di lavoro in team internazionali.

Nel corso della carriera ho inoltre acquisito ottime conoscenze su architettura diverse quali DB2, CICS e sistemi di automazione industriale

Posseggo buone conoscenze di vari tools (sia commerciali che open-source) per il project Planning, La modellazione di dati e processi (bpel – bpmn) ed il controllo di configurazione.
